

Intent

At St Francis Catholic Primary School our curriculum is optimistic, reflective, ambitious and relentless in its drive for continual improvement and excellence. Our quest is that all children will love learning and as a result will flourish academically and personally.

The aim is to support children to be happy, curious, positive, resilient young people, with high esteem and self-belief, who love to learn, contribute fully and achieve well.

At St Francis Catholic Primary School our aspiration is to educate children in the broadest sense. We want our children to be literate and numerate achieving their full potential in these areas, but also develop a curiosity and a breadth of knowledge and understanding across all subjects.

Our curriculum encourages children to develop as confident learners with a growth mindset, who learn well with and from others, enjoy challenge and appreciate constructive criticism, understand the learning process, are resilient and recognise that success comes through effort, practice and perseverance.

Our curriculum is a well-sequenced knowledge rich curriculum, organised in a coherent way building from year to year. Each module has a rationale which clearly articulates the reasoning behind the content and how each module enables progression across the curriculum building conceptual understanding and skills over time.
